

System Validation Evaluation Form

Cyberarena: A Simplified Interactive Variety of Gamified Hack and Defend Platform for Cybersecurity Learning

System Title: Cyberarena - Gamified Cybersecurity Education Platform

Developers: _____

Date of Validation: _____

Validator Name & Position: _____

Institution/Company: _____

Cybersecurity Certifications (if applicable): ☐ CISSP ☐ CEH ☐ Security+ ☐ CISM ☐ Other: _____

A. Evaluation Criteria

Rate each criterion from 1–5 (1 = Poor, 5 = Excellent)

Criteria	Description	Rating (1–5)
Educational Content Accuracy	Cybersecurity curriculum (CIA triad, malware, phishing, encryption) is technically accurate and industry-aligned	_____
Usability	Platform interface is user-friendly, navigation is intuitive, and learning modules are easy to access	_____
Reliability	System operates consistently without crashes, handles user interactions smoothly	_____
Content Quality	Tutorial topics are appropriate for students, explanations are clear and pedagogically sound	_____
Security Implementation	Authentication (Firebase/OAuth), data protection, and secure practices are properly demonstrated	_____
Learning Progression	Curriculum flows logically from beginner → intermediate → advanced cybersecurity topics	_____
System Performance	Platform responds quickly, loads efficiently, and performs well during interactive exercises	_____
Maintainability	System design allows easy content updates, module additions, and future modifications	_____
Aesthetics / UI Design	Interface design, layout, gamification elements, and visual appeal enhance learning experience	_____
Completeness of Features	All proposed cybersecurity modules (tutorials, quizzes, simulations, progress tracking) are implemented	_____

Total Score: _____ / 50

Percentage: _____ %

Overall Rating: (Circle one)

- ★ ★ ★ ★ ★ **Excellent** (45-50 points / 90-100%) - Exceeds expectations, production-ready
- ★ ★ ★ ★ **Very Good** (38-44 points / 76-89%) - Meets all requirements, minor improvements possible
- ★ ★ ★ **Good** (30-37 points / 60-75%) - Functional, some areas need enhancement
- ★ ★ **Fair** (22-29 points / 44-59%) - Basic functionality present, significant improvements needed
- ★ **Needs Improvement** (<22 points / <44%) - Major revisions required

B. Validator Comments

What are the strongest features of this cybersecurity education platform?

What improvements would you recommend?

Is the cybersecurity content accurate and suitable for students? ☐ Yes ☐ No ☐ Partially

Additional Observations:

C. Validation Status

- ☐ **APPROVED** - Ready for implementation and capstone completion
- ☐ **APPROVED WITH MINOR REVISIONS** - Conditionally approved (specify below)
- ☐ **REQUIRES REVISIONS** - Major improvements needed before approval

Specific Revisions Required:

D. Validator Approval

I certify that I have reviewed this cybersecurity education platform according to the criteria above. The ratings reflect my professional assessment of the system's educational quality, technical accuracy, and readiness for student use.
